

Castors and Wheels

Keep your business moving and your costs down

Choosing the correct wheel for an application is not always as easy as matching an existing wheel to one that looks like it on your shelf. HSS LTD have extensive experience in helping you choose the correct wheel for your application.

Three basic steps that if followed can ensure you get maximum working life from your wheels and castors.

- 1 - Identifying the surface of the floor the wheel is to run on.
- 2 - Calculating the static, dynamic loading and working in an appropriate safety factor.
- 3 - Movement, do you require swivel, fixed, braked or a combination type carriage.

HSS can help you make this choice. We have large stocks that can make up hundreds of different combinations of castor. If by and chance we don't have something in stock that fulfills your requirements HSS LTD have access to over 2500 product lines that are available on a next day service.

HSS Provides competitive solutions to all industries including.

Agricultural machinery, Automotive Sector, Bakery & High temperature, Conveyors, Food Processing and Clean room, Industrial, Trucks and trolleys,

We offer an on-site fitting service for Castors, as well as in-house fabrication for any modification work required.
